

Contents

V. C. GUPTA, S. KUMAR: Some theorems on generalized manifolds	1—9
Jerzy POPENDA: On the discrete analogy of Gronwall lemma	11—25
Paweł OLSZEWSKI: Cauchy's problem for a certain system of integro-differential equations of order $2p$	27—38
Adam ADAMÓW, Ryszard DESZCZ: On totally umbilical submanifolds of some class Riemannian manifolds	39—59
Jacek URBANOWICZ: On a certain non-linear contact problem for a one-dimensional parabolic equation of second order	61—83
Janina EWERT, Tadeusz LIPSKI: Lower and upper quasi-continuous functions	85—93
Zbigniew OLSZAK: Contact metric hypersurfaces in complex spaces	95—102
Maria FILAR, Jan MUSIAŁEK: On Dirichlet problem for Poisson's equation in the unbounded layer	103—113
Jan GÓROWSKI: On some boundary value problems for the equation $(\Delta - c^2)u=0$ in a half-space	115—123
Eulalia GRANDE: Sur les fonctions ayant la propriété (H)	125—131
Stanisław FUDALI: Homothetic coverings of frustums of simplices	133—150
Dieter SCHOTT: Decomposition properties of linear continuous operators in Banach spaces	151—163
Henryka SIEJKA: On estimation of the functional $ a_s - \alpha a_2^2 $, $\alpha \in \mathbb{C}$, in the classes of bounded univalent functions	165—187
Jacek DĄBROWSKI: Existence of optimal controls for partially observed general solutions of stochastic differential equations	189—210
Ram U. VERMA: Formulae of Fredholm type for singular integral operators with non-vanishing indices	211—228
Margret HESSE HÖFT: Sums of double systems of partially ordered sets	229—238
Wiesław SASIN, Zbigniew ŻEKANOWSKI: Some sheaves over a differential space	239—267
