

Contents

Maciej MACZYŃSKI, Tadeusz TRACZYK: Professor Roman Sikorski (1920—1983)	1—8
Sylvanus A. N. ENEDUANYA: The weighted (0,2) lacunary interpolation, I	9—21
Ram U. VERMA: The essential spectra of D-commuting systems	23—29
Kazimierz URBANIK: Joint distributions and commutability of observables	31—41
Lutz HEINDORF: Boolean algebras whose ideals are disjointly generated	43—64
Lech T. POLKOWSKI: On the fixed point property of finite ordered sets	65—76
Jan ROGULSKI: Operators with H^k coefficients and generalized Hodge — de Rham decompositions	77—89
Marian DAWIDOWSKI, Bogdan RZEPECKI: On bounded solutions of nonlinear differential equations in Banach spaces	91—102
Julian KLUKOWSKI, Maciej ZWORSKI: On the representation of P_0 -lattices being P-algebras	103—114
Paulina PYCH-TABERSKA: Approximation of periodic functions by the Euler and Borel means of Fourier series	115—129
Jacek MICHALSKI: C-derived polyadic groups	131—151
Jerzy BROWKIN: On the divisibility by 3 of $\# K_2 O_F$ for real quadratic fields F	153—159
Roman TABERSKI: On variations of the Wiener type	161—175
Aleksander RUTKOWSKI: On partially ordered sets with small initial segments	177—185
Sylvia PULMANNOVA: Commutators in orthomodular lattices	187—208
Anna ROMANOWSKA: Constructing and reconstructing of algebras	209—230
Jarosław CIEMNOCZOŁOWSKI, Władysław ORLICZ: Functions of bounded φ -variation and some related operators	231—251
Andrzej BORZYMOWSKI: Concerning a Goursat problem for some partial differential equation of order $2p$	253—277
Katarzyna LITEWSKA, Jerzy MUSZYŃSKI: The application of the finite elements method to the initial problems of nonlinear ordinary differential equations	279—293
Zbigniew LONC, Mirosław TRUSZCZYŃSKI: Decomposition of graphs into graphs with bounded maximum degrees	295—302
Jarosław WRÓBLEWSKI: On jets in differential spaces	303—317
Tadeusz TRACZYK, Wiesław ZARĘBSKI: Convex congruences on BCK-algebras	319—323
Janina KOTUS: $\Omega = \text{Per}$ for generic vector fields on some open surfaces	325—340
Hanna MATUSZCZYK: Inducing and coinducing of analytical premanifolds by mappings	341—346
Włodzimierz WALISZEWSKI: Foliations of differential spaces	347—352
Piotr BESALA, Gerard PASZEK: On the uniqueness of solutions to a parabolic system of differential-functional equations	353—368
Bronisław PRZYBYLSKI, Zbigniew ŻEKANOWSKI: On some equivalent conditions in subcartesian spaces	369—375
Andrzej SCHINZEL: Systems of exponential congruences	377—394
