Bolesław WOJDYŁO: Interpolation in universal (partial) algebras . . .	1—10
Józef SŁOMIŃSKI: On comparisons of algebras by using the enrichment theories and cloning systems	11—36
Jan GAŁUSZKA: On bisemilattices with generalized absorption laws, I	37—43
Antoni CHRONOWSKI: Extensions of inverse loops	45—55
Jana GALANOVÁ: Some properties of tensor products of semigroups .	57—65
Adam MORAWIEC: Krystyna PIROG-RZEPECKA: Theories of deductive systems equivalent to T_W	67—76
Marek BALCERZAK: A classification of σ -ideals in Polish groups . .	77—88
Katarzyna HAŁKOWSKA: Externally compatible identities in pseudo-complemented distributive lattices	89—93
Jerzy PŁONKA: Biregular and uniform identities of bisemilattices . .	95—108
Anna ROMANOWSKA: Some varieties of algebras defined by externally compatible identities	109—119
Anatolij DVUREČENSKIJ: Joint distributions of observables and measures with infinite values	121—139
Grzegorz JARZEMBSKI, Andrzej KURPIEL: One more concept of multiadjointness	141—157
Elżbieta ZAJĄC, Lucyna ZURAWSKA: The subdirectly irreducible diagonalizable algebras	159—162
Grzegorz JARZEMBSKI: Lattices of free extensions in categories of partially algebraic structures	163—183
Ernest PŁONKA: Remarks on weak automorphisms of 1-unary algebras	185—190
Józef SŁOMIŃSKI: Relative cogenerations with applications to tree automata and a theory of abstract algebras with feedback modifications	191—214
Kazimiera DYRDA: None of the variety $ E_n$, $n \geq 2$, is locally finite . .	215—219
W. BARTOL, D. NIWIŃSKI, L. RUDAK: Semiisomorphism vs. isomorphism of inner extensions of a partial algebra	221—227
W. BARTOL, D. NIWIŃSKI, L. RUDAK: The semilattice of inner extensions of a partial algebra	229—238
Leszek RUDAK: Definition of partiality	239—245
Andrzej KURPIEL: A monadic approach to the modal theory . . .	247—258
Barbara ROSZKOWSKA: The lattice of varieties of symmetric idempotent entropic groupoids	259—275
Anna ROMANOWSKA, Barbara ROSZKOWSKA: On some groupoid modes	277—290
Radosław GODOWSKI: Partial Greechie diagrams for modular ortho-lattices	291—297
Nazdar ISMAIL: On (m, n) -distributivity of pseudo Boolean algebras . .	299—307
