Jacek MICHAŁSKI: Improvement theorems for polyadic groups H -derived from groups	309—325
Chavdar LOZANOV: On the nonequivalency of the theorem of Miquel M_8 with a four-point case of the theorem M_4^2	327—334
Henryk ORYSZCZYSZYN: Ternary geometrical operations in Euclidean geometry	335—340
Jan S. ROGULSKI: Stratifications and gauge fields	341—353
Lesław GAJEK: Generalized Bayes estimators of a non-linear function of the natural parameter of an exponential family of distributions	355—365
Olga HADŽIĆ: Some fixed point and coincidence point theorems for multivalued mappings in topological vector spaces	367—376
Jacek WESOŁOWSKI: Conditioning in limit problem for order statistics	377—386
Jan STRABURZYŃSKI: On the convergence of successive approximations for functional-differential equations of hyperbolic type	387—400
Brian FISHER, Todor D. TODOROV: Operations with distribution vectors	401—412
Andrzej KASPERSKI: On the approximate schemes in the modular space	413—421
Demetra DEMETROPOULOU-PSOMOPOULOU: A prolongation of the real almost-product structure of a differentiable manifold	423—439
Marek ŁATKO: On a construction of all de Bruijn cycles defined by Lempel's homomorphism	441—455
Ryszard DESZCZ, Stanisław EWERT-KRZEMIENIEWSKI: Notes on manifolds admitting totally umbilical hypersurfaces	457—470
Zbigniew ŁUSZCZKI, Bogdan RZEPECKI: An existence theorem for ordinary differential equations of order $\alpha \in (0,1]$	471—475
Wiesław SASIN, Zbigniew ŻEKANOWSKI: On locally finitely generated differential spaces	477—487
M. DAWIDOWSKI, I. KUBIACZYK, B. RZEPECKI: An existence theorem for the hyperbolic equation $z_{xy} = f(x,y,z)$ in Banach spaces	489—493
Ireneusz KUBIACZYK: Fixed points for contractive correspondences	495—500
Michel HEBERT: Multireflections and multifactorization systems	501—517
Franciszek BOGOWSKI, Czesław BURNIAK: On the domain of local univalence and starlikeness in a certain class of holomorphic functions	519—536
Marian PRZEMSKI: On T_1 -cliquish functions	537—545
Zdzisław GRODZKI: Synthesis problem for deterministic controlled (k,m) — shift-registers	547—559
Krzysztof PRAZMOWSKI: The notion of directed field as an algebraic counterpart of ordered Euclidean plane	561—566
Tadeusz J. JANIK: The effect of numerical integration in finite element methods for solving quasilinear parabolic equations	567—582
PHAM BA TRUNG: Common behaviour of solutions of some collections of second order linear ordinary differential equations with periodic coefficients	583—588
Tadeusz KOWALSKI, Wawrzyniec SADKOWSKI: Existence and stability of global classical solutions for a first Fourier problem	589—601
Danuta STERNA: Orbits of K^+ -action on normal varieties	603—605
