Wiesława CHROMIK: On varieties of algebras defined by first regular identities	573—581
Priti BAJPAI, R. B. SAXENA: Some regular and singular pairs of Birkhoff interpolation	583—597
Valeriu POPA: Theorems on mappings into Hausdorff space	599—605
Luis C. de ANDRES, Manuel de LEÓN, Paulo R. RODRIGUES: Connections on tangent bundles of higher order	607—632
Zdzisław GRODZKI: Deterministic controlled shift-registers	633—650
Steffen ROCH, Bernd SILBERMANN: Not-strongly converging approximation methods	651—676
Jan AMBROSIEWICZ: Products of sets in linear groups	677—693
Ewa IGNACZAK, Paweł IGNACZAK: Approximation theorem for a field of measurable observables over a W^* — algebra	695—704
Helena MUSIELAK: Some estimations of averaged moduli of entire functions in Orlicz spaces	705—716
Eugeniusz JANIEC: Some sufficient conditions for univalence of holomorphic functions	717—727
Jerzy KRAWCZYK: One some projectively recurrent spaces	729—739
Janusz A. KOŁODZIEJCZYK: The effect of quadrature errors on the collocation — Galerkin solution of the two-point boundary value problem	741—754
Maria SZAPIEL: On annuli containing the zeros of polynomials	755—762
Erwin KASPAREK: The homomorphisms of the pseudo-orthogonal group of the index one into an abelian group	763—771
Jerzy PEŁCZEWSKI: Optimization of the system described by Fredholm's integral equation	773—787
Andrzej MĄDRECKI: On a formula concerning Stieltjes stochastic differentials	789—796
Wojciech WOJDOWSKI: Density topology involving measure and category	797—812
Mirosława MIKOSZ: Connections between the generalized Fourier transform and the Fourier gap series	813—821
SHI-JIE LI: On three dimensional pseudo-umbilical isotropic submanifolds	823—837
Stanisław SIUDUT: On an inverse problem for the normal singular integrals	839—847
Stanisław BUCHCIC: Generalization of the Pascal theorem to the n -dimensional projective space	849—860
Jacek JAKUBOWSKI: The functional law of the iterated logarithm for weakly multiplicative systems	861—867
Jan SAMSONOWICZ: K -theory for IM -bundles	869—886
Jacek SKWIERCZYŃSKI: Variational formulation for a hyperbolic problem	887—901
Mieczysław KRÓL: On some retrospective and prospective equations for a vector-valued quasi-diffusion process	903—916
Jerzy WYBORSKI: Variational formulation for homogeneous Dirichlet problem for a parabolic equation	917—928
Ali A. A. DAW: A formula for the number of retracts of finite Boolean algebras	929—937
