

Contents

Józef SIDOROWICZ: Полутень в тепловой дифракции на многоугольнике	939—953
B. G. PACHPATTE: On Ważewski's method of successive approximations for certain boundary value problems	955—966
Hanna MATUSZCZYK: On generalized foliations with locally connected leaves	967—971
Janina SLADKOWSKA: Sur une famille de fonctions univalentes et bornées	973—982
Tadeusz POREDA, Anna SZADKOWSKA: On the holomorphic solutions of certain differential equations of first order for the mappings of the unit ball in $\mathbb{C}^n$ into $\mathbb{C}^n$	983—996
Jan BOCHENEK: An inverse spectral problem for linear operators in Hilbert space	997—1005
Bronisław TEMBROWSKI: Quasi-topological Boolean algebras of reflexive and quasi-topological spaces	1007—1029
Maria MAKSYM, Anna ZMUREK: 3-structure generated on $M \times R$ by a manifold with the 3-structure	1031—1045
Józef MIAZGA, Andrzej WESOŁOWSKI: On the univalence of certain integrals	1047—1051
Ryszard DESZCZ: On Ricci-pseudo-symmetric warped products	1053—1065
Jan M. MYSZEWSKI: On maximal tori of the automorphism group of circular domain in $\mathbb{C}^n$	1067—1080
Eliza WAJCH: On some applications of limit elements of mappings	1081—1092
Tadeusz KONIK: On the tangency of sets of some class in generalized metric spaces	1093—1107
NGUYEN VAN MAU: Arithmetical operations on algebraic elements	1109—1119
Anatolij DVURECENSKIJ: A state criterion of the completeness for inner product spaces	1121—1128
Bogusław MERDAS: Remarks on Schatten — von Neumann classes C_p	1129—1141
Mirko POLONIJO: Transitive n -quasigroups	1143—1148
KHALIL I. TABASH: Automorphism groups of P_2 -lattices	1149—1157
Marek BALCERZAK: On σ -ideals having perfect members in all perfect sets	1159—1168
Tomasz DŁOTKO: An L^p approach to a parabolic problem with blowing up solutions	1169—1182
Jacek HEJDUK: Some properties of topological σ -ideals	1183—1189
Ewa STANKIEWICZ-WIECHNO, Janusz WĄSOWSKI: The comparison of situations in conflict theory. The stable situations	1191—1204
Irmina HERBURT: On intrinsic isometries and rigid subsets of Euclidean spaces	1205—1227
