M. ROCHOWSKI: Special problems of surface theory in the Euclidean 3-dimensional space	1—23
Andrzej KOSYK: Prospective Kolmogorov differential equations for discrete processes and their applications	25—34
B.G. PACHPATTE: On inequalities of the Opial type	35—45
Kazimierz SIENKIEWICZ: Determinant systems in a certain class of algebras	47—78
Mahmoud BOUTEFNOUCHET: L'analyse des éléments aux bords pour le problème aux limites mixte biharmonique	79—105
Romuald MAŁECKI: Application of the method of contour integration to the initial-boundary value problem for a parabolic system of even order	107—120
Marian LISKOWSKI: On additivity of Orlicz-Slobodeckii space	121—128
Huzoor H. KHAN: Saturation for Fourier series by matrix operator	129—133
Barbara GLANC: The structure of the second symmetric tensor of the biconformal mapping	135—142
Andrzej W. TURSKI: An iteration proof of the maximum principle	143—151
Marian DAWIDOWSKI, Ireneusz KUBIACZYK: On bounded solutions of hyperbolic differential inclusion in Banach spaces	153—159
C.—S. LIN: On uniformly convex and uniformly 2-convex 2-normed spaces	161—168
Josef KALAS, Miloš RÁB: Asymptotic properties of dynamical systems in the plane	169—185
Hüseyin BOR: On the absolute summability factors of infinite series	187—192
Joanna CZARNOWSKA, Grażyna KWIECIŃSKA: On the Darboux property of multivalued functions	193—199
Karol PETHE: The estimation of the fourth coefficient in the class of p-valent functions	201—205
Zbigniew BINDERMAN: On some properties of complex R-shifts	207—217
Izabela FOLTYŃSKA: Comparison theorems for systems integro-differential equations with advance arguments	219—227
Aleksander WASZAK: On two-modular spaces of double sequences	229—239
Valeriu POPA, Takashi NOIRI: Almost weakly continuous functions	241—251
Jacek DĄBROWSKI: Density estimation for stationary processes and for Markov processes	253—267
Andrzej MIKA: Pseudo-semidirect product of the abstract objects	269—277
Tadeusz JANKOWSKI: A numerical solution of implicit ordinary differential equations	279—295
Lothar v. WOLFERSDORF: A general class of nonlinear singular integral equations of Cauchy type	297—303
Ewa IGNACZAK: Convergence of subsequences in W^* -algebras	305—316
Jarosław SOBCZYK: On explosion of one dimensional process under additive noise	317—323
Waldemar Z. KARWOWSKI, Danuta PRZEWORSKA-ROLEWICZ: General linear boundary value problems for polynomials in right invertible operators	325—340
Agnieszka PLUCIŃSKA: A characterization of Gaussian processes by infinitesimal moments	341—351
Jerzy GRABOWSKI: On some approximate method for Fredholm's integral equation of the second kind with bounded kernel	353—359
Wiesław SASIN: Gluing of differential spaces	361—384
Paweł SZABŁOWSKI: Binormal law characterized by polynomial conditional moments	385—402
