Tadeusz KOSTRZEWSKI: <i>BC</i> -solutions of nonlinear functional equation—a nonuniqueness case	275–285
Jan KUREK: On the first order natural operators transforming 1-forms on manifold to linear frame bundle	287–293
Michał MUZALEWSKI, Krzysztof PRAŻMOWSKI: Axiomatic investigations on symplectic geometry	295–306
Henryk UGOWSKI: On continuous dependence of solutions to the first Fourier problem with respect to parameter	307–325
Jacek BANASIAK: A counterexample in the theory of mixed boundary value problems for elliptic equations in non-smooth domains	327–335
Nguyen CANG, Nguyen KIM TAN: Positivité et optimisation d'une classe de systèmes discrets	337–340
Brunon SZOCIŃSKI: Some properties of the projective space	341–351
Andrzej KASPERSKI: Notes on the theory of integral equations of multi-functions	353–358
Jan AMBROSIEWICZ: On conjugacy classes in linear groups	359–362
Takashi NOIRI, Valeriu POPA: Almost weakly continuous multifunctions	363–380
Marian PRZEMSKI: Some generalizations of continuity and quasi-continuity of multivalued maps	381–400
Janusz ZYSKOWSKI: The discrete maximum principle for some optimization problem of multidimensional systems	401–411
J. PRASAD: On Hermite and Hermite-Fejér interpolation of higher order	413–425
Henryk DĘBIŃSKI, Izydor DZIUBIŃSKI: Some remarks on infinite algebraic linear equations	427–444
Pavol KONÓPKA, Sylvia PULMANNOVÁ: Commutators in orthomodular posets	445–457
Uluğ ÇAPAR: Weak convergence of probability measures along projective systems	459–472
Tomasz DŁOTKO: Singular limit in a parabolic equation	473–481
Jerzy POPENDA: On multidimensional Wirtinger's type discrete inequalities	483–491
Tadeusz KONIK: On the reflexivity symmetry and transitivity of the tangency relation of sets of the class $A_{p,k}^*$ in generalized metric spaces	493–500
Eliza WAJCH: Sets of functions generating compactifications via uniformities. Connectedness	501–511
S. D. BAJPAI: A new class of Fourier Bessel-Jacobi series of Meijer's G -function	513–515
Jacek MAŃDZIUK: An isomorphism theorem for unicyclic graphs	517–528
Jan SAMSONOWICZ: Chern classes of bundles of rank two on P^5	529–533
