

Contents

A. ROST, J. ŚLADKOWSKA: Sur le fonction de Bieberbach–Eilenberg satisfaisant à deux au moins équations du type de Schiffer	253–270
B. CUI: Oscillation criteria for second order nonlinear differential equations . .	271–278
MURSALEEN: Application of infinite matrices to Walsh functions	279–282
PHAN VAN HAP, PHAN HUY THIEN: The AD method for the approximate solution of the Wigner equations	283–286
M. BUBA-BRZOZOWA: Some questions concerning the problem of determining of projective collineations	287–292
M. TIMOUMI: Oscillations de systèmes hamiltoniens surquadratiques non coercitifs	293–300
B. P. PACHPATTE: On multivariate Greene type inequalities	301–310
C. CHMIELECKI: The rotation number of a functional with respect to a uniquely ergodic one-parameter group of homeomorphisms	311–328
B. TEMBROWSKI: Non-topological dual spaces of total complete and atomic quasi-topological Boolean algebras	329–346
I. DZIUBIŃSKI, K. SZCZEPANIAK: Starshapedness of the level sets and coincidence set in the special case of the Dirichlet obstacle problem	347–350
J. KORŃSKI: The first linear polyparabolic problem for the curvilinear time spatial trapezium	351–366
G. ANIOŁ: On the rate of convergence of some discrete operators	367–377
Z. GRODZKI: The deterministic $(k_1, \dots, k_m)$ -nets of the parallel controlled shift-registers	379–387
L. J. CIACH: Around Jensen's inequality	389–392
B. P. DAMYANOV: Generalized functions on C^∞ -manifold: A sheaf-theoretic viewpoint	393–399
M. TELCI, K. TAŞ: Some fixed point theorems for pairs of expansion type mappings	401–405
K. NOWAKOWSKI: On the double Akhiezer and Levitan singular integrals . .	407–415
M. LUPA: W_γ^r -solutions of a linear iterative functional equation	417–425
N. ENDRES, M. LEISCHNER: Powers and iteration processes on modules . .	427–447
S. FORMELLA: Geodesic mappings of pseudo-Riemannian manifolds	449–460
S. FUDALI, L. KACZMAREK, M. KŁECZEK: Affine motion in the recurrent SAK_n^* (II)	461–473
M. WIŚNIEWSKI: Multidimensional point processes of extreme order statistics	475–485
S. KROTOSZYŃSKI: Covering a quadrilateral by six homothetical copies . . .	487–492
I. BEG, A. AZAM: On iteration methods for multivalued mappings	493–499
P. N. AGRAWAL, V. GUPTA: On convergence of derivatives of Phillips operators	501–510
E. JANIEC: On starlike and convex maps of a Banach space into the complex plane	511–516
T. FILIPCZAK: Monotonicity theorems for the I -proximal local system . . .	517–520
Z. J. JAKUBOWSKI, A. LECKO: On certain classes of quasi—typically—real functions	521–536
J. GRABOWSKI: Properties of some approximate solution of the weakly singular Fredholm integral equation	537–548
A. PISKOREK: Local in time existence of solutions to the some linear constitutive model in hypoelasticity	549–559
J. SAMSONOWICZ*: A remark to the “Chern classes of bundles of rank two on P^5 ”	561
