M. ROCHOWSKI: Umbilical points on analytic surfaces diffeomorphic with the 2-dimensional sphere in Euclidean 3-dimensional space	497-518
M. E. TITENSKI: On some classes of systems of integral inequalities	519-531
K. K. DUBE: Almost r -contact semi-symmetric metric Finsler connection on vector bundle	533-540
U. C. GAIROLA, S. L. SINGH, J. H. M. WHITFIELD: Fixed point theorems on product of compact metric spaces	541-548
B. PRZYBYLSKI: On principal maps of the plane	549-566
R. A. MAHMOUD, D. A. ROSE: A note on submaximal spaces and SMPC functions	567-573
J. POPENDA: On the oscillation of solutions of difference equations	575-586
Y. KÜÇÜK: On some characterizations of δ -continuous multifunctions	587-595
VU VAN HUNG: On the stability of the difference schema approximating Cauchy's problem for a parabolic equation	597-602
A. CHITRA, P. V. SUBRAHMANYAM: A note on contractors in random normed spaces	603-609
M. K. AOUF: On certain subclass of convex functions	611-618
J. HEJDUK: Convergence with respect to the σ -ideal of meager sets in separable category bases	619-623
M. STOPA: On the form of solutions of the iterative functional equation of the n -th order	625-634
L. A. CORDERO, P. E. PARKER: Symmetries of sectional curvature on 3-manifolds	635-650
S. CHALADUS: An application of Nagell's estimate of the least odd quadratic nonresidue	651-655
J. ARHIPAINEN: On some properties of algebras of lmc-algebra valued functions	657-662
J. AMBROSIEWICZ: On the sets $C_V C_V$ in the group $SL(n, K)$	663-666
K. CHEŁMIŃSKI: Global in time existence of solutions to the constitutive model of Bodner-Partom with isotropic hardening	667-688
S. STOJŃSKI: L_α -almost periodic functions	689-696
H. K. PATHAK, V. POPA, V. V. S. N. LAKSHMI: A fixed point theorem for m -weak** commuting mappings	697-702
S. GINALSKA: On some properties of solutions of the equation $x^{(n)} + ax = 0$	703-706
A. SCHLEIERMACHER, J. M. TARGONSKI: On functions with quasi-companion	707-724
F. M. FILIPCZAK: On locally symmetric sets	725-732
W. BRYC, W. SMOLEŃSKI: On Gaussian random measures generated by empirical distributions of independent random variables	733-738
W. PRÓSZYŃSKI, A. SOSNOWSKI: Matrix expressions for minimum semi-norm least squares solutions of linear systems and the related inverse	739-746
