I. BEG, R. ALI: Some properties of the Hausdorff distance in probabilistic metric spaces	243–249
B. PRZYBYLSKI: Singularities of principal-directed curves in the plane, II	251–270
N. ENDRES: Idempotent and distributive group related groupoids, I	271–290
N. ENDRES: Idempotent and distributive group related groupoids, II	291–308
M. BALCERZAK: On Borel sets modulo a σ -ideal	309–316
J. PATEL, M. ACHARYA: Certain classes of p -valent analytic functions	317–331
J. AMBROSIEWICZ: The inequality $cn(PSL(n, K)) \leq 4$ holds for $n = 2, 3$ and infinite field K	333–336
C. CALIN: Contact CR -submanifolds of a nearly Sasakian manifold	337–348
M. LISKOWSKI: Some characterization of dual space of Orlicz-Slobodeckii space	349–355
NGUYEN VAN MAU, NGUYEN MINH TUAN: Characterizations of polynomials in right invertible operators	357–362
Z. J. JUREK: s -stability and random integral representations of limit laws	363–370
C. ORHAN: FK spaces that include strongly A -summable sequences	371–375
S. PERZ, L. S. ZAREMBA: On a certain subclass of (α, ω) -partitionable graphs	377–380
V. POPA, T. NOIRI: On upper and lower almost α -continuous multifunctions	381–396
N. ERGUN, T. NOIRI: Further results on ideals	397–406
G. KOHR, P. LICZBERSKI: On some sufficient conditions for univalence in C^n	407–412
M. M. TRIPATHI, K. D. SINGH: Almost semi-invariant submanifolds of an ϵ -framed metric manifold	413–426
N. M. ALI: Some fixed point theorems	427–431
Z. RIEČANOVÁ: On order continuity of quantum structures and their homomorphisms	433–443
T. D. NARANG: Best approximation and best simultaneous approximation in ultrametric spaces	445–450
W. W. BEIN, P. K. PATHAK: A characterization of the Monge property and its connection to statistics	451–457
T. RYBICKI: Homology of the group of leaf preserving homeomorphisms	459–464
J. PUSZ: A note on a characterization of the gamma distribution by regression of polynomial statistics on residuals	465–469
