

Contents

J. KNOP, T. KOSTRZEWSKI, M. LUPA, M. WRÓBEL: On a special case of the Gołąb-Schinzel functional equation	475–478
I. LIBICKA, B. SZKOPIŃSKA: On directional $\mathcal{I}_1$ - density points	479–484
I. CHAJDA, Z. SEIDL: An algebraic approach to partial lattices	485–494
NGUYEN VAN MAU, NGUYEN MINH TUAN: Algebraic properties of generalized right invertible operators	495–508
V. PAMBUCCIAN: On the simplicity of an axiom system for plane Euclidean geometry	509–512
T. D. NARANG: Characterizations of elements of best approximation and ε -approximation in non-archimedean normed spaces	513–517
M. MARIN: Some estimations on energy in thermoelasticity of micropolar bodies	519–536
M. A. KHAN: Discrete hypergeometric functions and their properties	537–544
J. PEČARIĆ, I. BRNETIĆ: Note on generalization of Godunova-Levin-Opial inequality	545–549
R. YUE CHI MING: A note on YJ -injectivity	551–556
A. PHAM NGOC DINH, NGUYEN THANH LONG: The semilinear wave equation associated with a nonlinear boundary	557–572
V. GUPTA, G. S. SRIVASTAVA: Saturation theorem in L_p -approximation by modified Szász-Mirakyan operators	573–578
N. A. SOARE: On the derivations in the deformation algebra of two linear connections	579–584
M. ÇIÇEK: A note on two weak forms of open mappings and Baire spaces	585–590
G. LUGOVAYA, A. SHERSTNEV: On extending an unbounded orthogonal vector measure in a semifinite von Neumann algebra to a weight	591–598
E. SUSŁOWSKA: The Weierstrass-type condition for a minimum in a Bolza optimal control problem	599–620
T. B. SINGH: Common fixed point theorems in two Menger spaces	621–628
E. IGNACZAK: Weyl-von Neumann type theorems with the perturbation vanishing on a given subspace, I	629–634
B. GLANC, A. JAKUBOWICZ, H. KLECZEWSKA: The generalized Reissner-Nordström space-time	635–639
M. PIASECKI: A geometrical characterization of $AUMD$ Banach spaces via subharmonic functions	641–654
J. DZIOK: The order of starlikeness of the p -valent α -convex functions and Nunokawa's conjecture	655–660
M. WIŚNIEWSKI: Extremes in multivariate mixing sequences	661–669
J. SZMYD, S. SZUFLA: On the Aronszajn property for an integro-differential equation in Banach spaces	671–678
D. BOBROWSKI, B. POPOWSKA: The estimate of the error for approximation of some discrete distribution by the geometric distribution	679–686
W. SADKOWSKI: Global exact controllability for generalized wave equation	687–696
