K. GAJEWSKA-KURDZIEL, K. MRUCZEK: On some sets of identities satisfied in Abelian groups	447–453
L. BERAN, M. SAARIMÄKI: Lattices respecting convex decompositions, II	455–460
Y. H. KIM, H. S. KIM: Quotient structure of <i>BCI</i> -algebras via fuzzy ideals	461–467
M. H. ARMANIOUS: Commutative loops of exponent 3 with $x \cdot (x \cdot y)^2 = y^2$	469–475
D. VĂLCAN: Abelian groups with the direct summand sum property	477–491
M. IVAN: A note on a Cauchy-type mean value theorem	493–494
J. PATEL, P. SAHOO: Properties of a class of analytic functions involving a linear operator	495–507
F. BOGOWSKI, A. WESOŁOWSKI: The construction of a certain quasi-conformal extension of the functions defined in the unit disc, on the closed plane	509–520
N. MATZAKOS, N. S. PAPAGEORGIOU: Periodic solutions for evolution inclusions with time-dependent subdifferentials	521–538
J. K. CHUNG, P. K. SAHOO: General solution of some functional equations related to the determinant of some symmetric matrices	539–544
Y. ZHOU, B. ZHANG: Comparison theorems for the oscillation of higher order neutral delay difference equations	545–555
R. CIARSKI: Stability of difference equations generated by quasilinear differential functional problems	557–571
W. SMAJDOR: Entire solutions of a functional equation of Pexider type	573–582
C. BARDARO, J. MUSIELAK, G. VINTI: On nonlinear integral equations in some function spaces	583–592
A. A. MEHEMED: An application of Kwapień's theorem to the investigation of the structure of L_0 -space	593–598
L. A. KHAN, A. B. THAHEEM: Operator-valued multiplication operators on weighted function spaces	599–605
Ş. ALPAY, A. UYAR: On local approximation of positive operators	607–620
M. AKKOUCHI: Fixed point theorems using diameters of level sets and the notion of r.g.i. mapping	621–628
D. PRZEWORSKA-ROLEWICZ: Multidimensional Riemann–Hilbert type problems in Leibniz algebras with logarithms	629–644
M. CRĂŞMĂREANU, S. S. DRAGOMIR: $2k$ -inner products in real linear spaces	645–656
J. EWERT: On cliquishness of maps of two variables	657–670
M. A. KŁOPOTEK: A new space-saving Bayesian tree construction method for high dimensional data	671–684
Z. DUDEK: Computing equivalent tabular functions	685–697
