

Contents

Z. RIEČANOVÁ: Distributive atomic effect algebras	247–259
A. DVUREČENSKIJ, T. VETTERLEIN: On pseudo-effect algebras which can be covered by pseudo MV-algebras	261–282
M. A. CHAUDHRY, A. B. THAHEEM: On (α, β) -derivations of semiprime rings	283–287
E. VASSILIOU: On the cohomology and geometry of principal sheaves	289–306
Z. GRANDE, E. STROŃSKA: On an ideal of linear sets	307–311
L. R. BERRONE: Characterization of domains through families of measures	313–328
H. HAMADA, H. SEGAWA: An elementary proof of a Schwarz lemma for the symmetrized bidisc	329–334
P. RUSEV: Holomorphic extension of locally Hölder functions	335–342
J. BARIS, A. BURACZEWSKI: Periodic solutions of the Riccati equation in Banach spaces	343–353
J. NAPIÓRKOWSKA: Smoothing effect in semilinear parabolic equations . .	355–368
K. URBĄSKA: Parabolic semilinear differential problem with nonlocal conditions in an unbounded domain	369–382
T. ŚWIDERSKI: Global approximation theorems for the generalized modified Szász-Mirakyan operators in polynomial weight spaces	383–392
N. T. LONG, D. V. RUY: On the nonexistence of positive solution of some nonlinear integral equation	393–404
S. STEVIĆ: Stability of a new iteration method for strongly pseudocontractive mappings	405–412
H. K. PATHAK, S. N. MISHRA, A. K. KALINDE: Some Gregus type common fixed point theorems with applications	413–426
N. SHAHZAD: Coincidence points and R -subweakly commuting multivalued maps	427–431
W. M. MIKULSKI: On the contact (k, r) -coelements	433–449
C. CĂLIN: On the geometry of hypersurfaces in a quasi-Sasakian manifold .	451–462
A. DJOUDI: A common fixed point theorem for compatible mappings of type (B) in complete metric spaces	463–470
M. A. AHMED: Common fixed point theorems for set-valued and single-valued mappings	471–481
A. MIKUCKA: Graph quasi-continuity	483–494
R. ČIEGIS: Super-convergence of the a posteriori error estimators for finite- element solutions	495–506
