

Contents

Z. RIEČANOVÁ: Block-finite effect algebras and the existence of states . . .	507–517
A. WOJTUNIK: On some M -hyperidentities of varieties	519–524
O. B. FOFANA: Classification des anneaux de Heyting	525–530
O. B. FOFANA: La représentation numérique de la pseudo-algèbre de Boole	531–536
J. A. POMYKAŁA: On the notion of homomorphism in many-sorted algebras	537–541
O. ECHI, N. JARBOUI: On residually integrally closed domains	543–550
S. S. DRAGOMIR: A Grüss type inequality for isotonic linear functionals and applications	551–562
W. KRÓLIKOWSKI: A Clifford-type structure	563–578
R. K. SAXENA, M. A. PATHAN: Asymptotic formulas for unified elliptic-type integrals	579–589
A. CERNEA: Integrodifferential inclusions in non separable Banach spaces .	591–602
E. BRESTOVANSKÁ: Qualitative behaviour of an integral equation related to some epidemic model	603–609
S. A. SHKARIN: Sequentially continuous non-linear fundamental systems of solutions of affine equations in locally convex spaces	611–626
R. LABBAS, S. MAINGOT: Singularities in boundary value problems for an abstract second order differential equation of elliptic type	627–652
J. MATKOWSKI, J. OKRZESIK: On a composite functional equation	653–658
S. KOZIEŁ: Mixed problems for infinite systems of quasilinear hyperbolic functional differential equations	659–674
N. HUSSAIN, A. R. KHAN: Common fixed points and best approximation in p -normed spaces	675–681
NGUYEN THANH LONG, ALAIN PHAM NGOC DINH, TRAN NGOC DIEM: Asymptotic expansion of the solution for nonlinear wave equation with mixed non-homogeneous conditions	683–695
R. P. SINHA, A. N. MOHAMMED: Fourier analysis on locally convex spaces of distributions, I.	697–709
E. GALEWSKA: A general statement of dual first-order sufficient optimality conditions for the generalized problem of Bolza	711–720
D. R. SAHU: On generalized Ishikawa iteration process and nonexpansive mappings in Banach spaces	721–734
D. PRZEWORSKA-ROLEWICZ: Generalized Sturm separation theorem . .	735–746
G. HERZOG: On quasimonotone homeomorphisms in ordered Banach spaces	747–755
J. JANUSZEWSKI: Translative packing two squares in the unit square . . .	757–762
A. DJOUDI: A unique common fixed point for compatible mappings of type (B) satisfying an implicit relation	763–770
