

Contents

L. F. MONTEIRO: Number of epimorphisms between finite axled n -valued Moisil algebras	1–11
S. LEERATANAVALEE: Submonoids of generalized hypersubstitutions . . .	13–22
S. E. ATANI, A. Y. DARANI: On weakly primal ideals (I)	23–32
Z. JELONEK: On effective non-ample divisors	33–35
I. KOSI-ULBL: Identities with two automorphisms on semiprime rings . . .	37–42
B. G. PACHPATTE: New inequalities of Čebyšev type for double integrals .	43–50
K.-L. TSENG, S. R. HWANG, S. S. DRAGOMIR: On some new inequalities of Hermite-Hadamard-Fejér type involving convex functions	51–64
A. BANERJEE: Non linear differential polynomials sharing one value	65–75
J. DZIOK: Some relations including various linear operators	77–84
H. HAMADA, G. KOHR: k -fold symmetrical mappings and Loewner chains .	85–94
Q. ZHANG, F. QIU, Z. JI: Oscillation theorems for a class of second order nonlinear differential equation with perturbation	95–105
A. LEŚNIEWSKI: Adjoint functions to boundary solutions of differential inclusions and smoothness of barrier solutions on semipermeable surfaces	107–114
A. SIKORSKA-NOWAK: The existence theory for the differential equation $x^{(m)} = f(t, x)$ in Banach spaces and Henstock-Kurzweil integral	115–124
A. KĘPCZYŃSKA: Implicit difference methods for Hamilton-Jacobi differential functional equations	125–150
K. A. TOPOLSKI: On the unbounded solutions for parabolic differential-functional Cauchy problem	151–160
Y. BOLAT: Oscillation criteria for a higher order functional difference equation with oscillating coefficient	161–168
L. LOSONCZI: Homogeneous non-symmetric means of two variables	169–180
M. ŞENGÖNÜL: On the Zweier sequence space	181–196
A. DUTKIEWICZ: A Kneser-type theorem for an integral equation in locally convex spaces	197–202
A. RAFIQ: Strong convergence of an implicit iteration process for a finite family of quasi-contractive operators	203–208
E. EKICI: On separated sets and connected spaces	209–217
T. SUZUKI: Fixed point theorems for more generalized contractions in complete metric spaces	219–227
D. JABŁONSKI, P. OPROCHA: A numerical view on topological transitivity and mixing for symbolic dynamics	229–238
