

Contents

S. SCHLICKER, CH. BAY, A. LEMBCKE: Correcting Theorem 1 from "When lines go bad in hyperspace"	237–240
I. CHAJDA, H. LÄNGER: Quantifiers on lattices with an antitone involution	241–246
Z. ČERIN: Sums of products of generalized Fibonacci and Lucas numbers	247–258
A. E. PATKOWSKI: On some partitions where even parts do not repeat	259–263
R. WITUŁA, D. SŁOTA: Contributions to the Erdős' conjecture on arithmetic progressions	265–268
G. BIŃCZAK, J. KALETA: Cyclic entropic quasigroups	269–281
G. A. ANASTASSIOU: Poincaré and Sobolev type inequalities for Widder derivatives	283–296
H. X. DU, Y. MIAO: Several extended analogues of Hilbert's inequalities	297–302
B. SZAL: Application of the <i>MRBVS</i> classes to embedding relations of the Besov classes	303–322
J. LIU: Existence and global exponential stability of periodic solution of high-order Cohen-Grossberg neural network with impulses	323–338
B. G. PACHPATTE: New integral and finite difference inequalities in three variables	339–349
M. TIMOUMI: Subharmonic and multiple periodic solutions for Hamiltonian systems with local partial sublinear nonlinearity	351–370
WEN-RONG LI, SUI SUN CHENG: A Picard Theorem for iterative differential equations	371–380
Z. ERCAN: A characterization of u -uniformly completeness of Riesz spaces in terms of statistical u -uniformly pre-completeness	381–385
M. PRAŹMOWSKA: On some regular multi-Veblen configurations, the geometry of combinatorial quasi Grassmannians	387–402
N. SÖNMEZ: Some features in connection with triangles in the Poincaré upper half plane	403–409
W. CIEŚLAK, J. WOŁOWIK: g -chordal curves	411–422
E. TURHAN, T. KÖRPINAR: Characterize on the Heisenberg group with left invariant Lorentzian metric	423–428
L. PASICKI: Ascoli's theorems	429–434
W. M. MIKULSKI, J. TOMÁŠ: Reduction for natural operators on projectable connections	435–439
T. TKALIŃSKI: Approximation of market valuations on the set of risk measures	441–452
