A. GÖRLICH: Planar packing of cycles and unicyclic graphs	673–679
J. KALINOWSKI: On preservers of singularity and nonsingularity of matrices	681–685
M. S. METWALLY, M. T. MOHAMED, A. SHEHATA: Generalizations of two-index two-variable Hermite matrix polynomials	687–701
J. BIELAWSKI, J. TABOR: An embedding theorem for unbounded convex sets in a Banach space	703–709
M. GREGORCZYK: Univalent harmonic mappings with two preassigned values	711–722
A. CERNEA: On a boundary value problem for a third order differential in- clusion	723–730
M. S. N. MURTY, G. S. KUMAR, P. N. LAKSHMI, D. ANJANEYULU: On Ψ -instability of non-linear matrix Lyapunov systems	731–743
Y. AKILA: On a non-local parabolic problem	745–755
P. GŁOWIŃSKI, A. ŁADA: Asymptotic stability of solutions to the equations of linear elasticity and thermoelasticity in viscoporous media	757–779
R. WITUŁA, D. SŁOTA: The convergence classes of divergent permutations	781–796
H. K. NASHINE: Common fixed point and best approximation for Banach operator pairs in non-starshaped domain	797–807
K. CHANDRASEKHARA RAO: Some rate spaces	809–816
B. AQZZOUZ, K. BOURASS: Some properties of positive weak Dunford-Pettis operators on Banach lattices	817–823
M. BORICEANU: Fixed point theory on spaces with vector-valued b -metrics	825–835
S. KUTUKCU, S. SHARMA: A common fixed point theorem in non-Archimed- ean Menger PM-spaces	837–849
E. FABIŃSKA: Covering a reduced polygon by a disk	851–855
B. SAHIN: Contact horizontally conformal submersions	857–868
U. C. DE, A. K. GAZI: On almost pseudo conformally symmetric manifolds	869–886
D. O'REGAN, M. ABBAS: Necessary and sufficient conditions for common fixed point theorems in fuzzy metric space	887–900
A. BATOR, W. ZIĘBA: Expectation in metric spaces and characterizations of Banach spaces	901–908
