

DISCRETE MATHEMATICS AND APPLICATIONS

(ISBN 0924-9265)

Vol. 15, No. 2, pp. 105–210

2005

CONTENTS

Convergence in distribution of random mappings of finite sets to branching processes <i>B. A. Sevastyanov</i>	105
Calculation of moments of combinatorial statistics of symmetrically dependent random variables <i>A. M. Zubkov and D. V. Shuvaev</i>	109
Approximation of the moments of arbitrary integer orders by generalised factorial powers <i>A. P. Baranov and Yu. A. Baranov</i>	125
Random sequences of the form $X_{i+1}=a_iX_i+b_i$ modulo n with dependent coefficients a_i, b_i <i>I. A. Kruglov</i>	145
Limit theorems on sizes of trees in a random unlabelled forest <i>Yu. L. Pavlov</i>	153
A probabilistic algorithm for finding the term rank of non-negative matrices <i>D. A. Kuropatkin</i>	171
Homomorphisms of binary shift registers <i>V. I. Solodovnikov</i>	179
Optimisation in Boolean-valued networks <i>V. N. Salii</i>	195
On generalisations of the notion of semirecursiveness <i>A. N. Degtev</i>	201
On stable and unstable trees <i>V. A. Kolmykov</i>	207
