Igor N. Kovalenko, Kiev
Yuri I. Matiyasevich, St. Petersburg
Yuri V. Prokhorov, Moscow
Lev Ya. Savelyev, Novosibirsk
Sergei A. Stepanov, Moscow

DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

ABSTRACTED/INDEXED IN Mathematical Reviews and Zentralblatt MATH.

PRINTING Franz X. Stückle Druck und Verlag e.K., Ettenheim

Printed in Germany

V. V. LYSIKOV	
On the algebras of almost minimal rank	493
S. S. MARCHENKOV	
Definition of positively closed classes by endomorphism semigroups	511
N. V. BEZVERKHNI	
The power conjugacy search problem in a cyclic subgroup in groups with the condition $C(3)$ & $T(6)$	521
E. D. SCHWAB	
Lawvere intervals and the Möbius function of a Möbius category	545
V. A. BUEVICH AND M. A. PODKOLZINA	
On algorithmic solvability of the A -completeness problem for systems of boundedly determinate functions containing all one-place boundedly determinate S -functions	555
P. S. DERGACH	
On uniqueness of alphabetic decoding	571
V. A. KOLMYKOV	
On unstable branching graphs	583
D. S. MALYSHEV	
Extremal sets of graphs in the problem of demarcation in the family of hereditary closed classes of graphs	595
G. I. IVCHENKO AND M. V. SOLDATKINA	
Statistical problems on random permutations with censored data	609
A. V. SHKLYAEV	
On large deviations of branching processes in a random environment with arbitrary initial number of particles: critical and supercritical cases	619
E. E. DYAKONOVA	
Multitype branching processes evolving in a Markovian environment	639
I. K. DASSIOS	
On solutions and algebraic duality of generalised linear discrete time systems	665
R. N. BOYARINOV	
On the number of Gram's intervals containing the ordinates of successive zeros of the Riemann zeta function	683
