Igor N. Kovalenko, Kiev
Yuri I. Matiyasevich, St. Petersburg
Lev Ya. Savelyev, Novosibirsk
Sergei A. Stepanov, Moscow
Yuri I. Yanov, Moscow

DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

ABSTRACTED/INDEXED IN Mathematical Reviews and Zentralblatt MATH.

Printed in Germany

A. L. GAVRILYUK AND A. A. MAKHNEV	
Distance-regular graph with the intersection array $\{45, 30, 7; 1, 2, 27\}$ does not exist	225
D. S. MALYSHEV	
The impact of the growth rate of the packing number of graphs on the computational complexity of the independent set problem	245
A. N. MAKSIMENKO	
Traveling salesman polytopes and cut polytopes. Affine reducibility	251
E. B. TITOVA AND V. N. SHEVCHENKO	
Minors of the constraint matrix in multi-index transport problems	261
A. M. ZUBKOV AND V. E. TARAKANOV	
Cycle structure of power mappings in a residue classes ring	273
T. I. SMYSHLYAEVA	
A criterion for the automata realizable functions to be boundedly deterministic	299
M. V. NIKOLAEV AND D. V. MATYUKHIN	
On the complexity of two-dimensional discrete logarithm problem in a finite cyclic group with effective automorphism of order 6	313
A. A. RODIN	
The completeness criterion for some systems containing P -sets of automaton functions	327
D. S. ROMANOV	
On the synthesis of circuits admitting complete fault detection test sets of constant length under arbitrary constant faults at the outputs of the gates	343
V. P. ELIZAROV AND V. L. KURAKIN	
Factorially solvable rings	363
G. B. BELYAVSKAYA	
Identities with permutations and quasigroups isotopic to groups and to Abelian groups	369
O. A. STARIKOVA	
Classes of projectively equivalent quadrics over local rings	385
