DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

Contents

Oleg V. Kamlovskiy

Estimating the number of solutions of systems of nonlinear equations with linear recurring arguments by the spectral method — 199

Yuri L. Pavlov and Elena V. Feklistova

On limit behavior of maximum vertex degree in a conditional configuration graph near critical points — 213

Vahe G. Sargsyan

Estimates of the number of (k, l) -sumsets in the finite Abelian group — 223

Aleksandr S. Semenov and Dmitriy A. Shabanov

Independence numbers of random sparse hypergraphs — 231

Valeriy A. Voloshko

Steganographic capacity for one-dimensional Markov cover — 247
