DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

Contents

Aleksandr V. Cheremushkin

**Estimating the level of affinity of a quadratic form
— 339**

Alexander M. Chudnov

**Cyclic decomposition of sets, set-splitting digraphs and
cyclic classes of risk-free games — 349**

Dmitriy V. Dmitruschenkov and Alexander V. Shklyaev

**Large deviations of branching processes with
immigration in random environment — 361**

Vladimir G. Mikhailov

**On the probability of existence of substrings with the
same structure in a random sequence — 377**

Sergey B. Rodin

Linearly realizable automata — 387

Vitaliy A. Voblyi

**On the number of labeled outerplanar k -cycle blocks
— 403**

Andrey M. Zubkov and Maksim P. Savelov

**Convergence of the sequence of the Pearson statistics
values to the normalized square of the Bessel process
— 405**
