DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

PRINTING Franz X. Stickle Druck und Verlag e.K., Ettenheim

Contents

Aleksandr V. Chashkin

On the average-case complexity of underdetermined functions — 201

Natalia Yu. Enatskaya

Combinatorial representations for the scheme of allocations of distinguishable particles into indistinguishable cells — 223

Boris A. Pogorelov and Marina A. Pudovkina

On groups containing the additive group of the residue ring or the vector space — 231

Dmitrii V. Sirotkin and Dmitriy S. Malyshev

A method of graph reduction and its applications — 249

Vladimir E. Victorenkov

On the structure of digraphs of polynomial transformations over finite commutative rings with unity — 259
