DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

Contents

Grigorii V. Antiufeev

**Diagnostic tests under shifts with fixed filling tuple
— 309**

Aleksandr V. Chashkin

**On the average-case complexity of Boolean functions
under binomial distribution on their domains — 315**

Fedor M. Malyshev

**Boolean analogues of the Pascal triangle with maximal
possible number of ones — 319**

Andrey V. Menyachikhin

**The limited deficit method and the problem
of constructing orthomorphisms and almost
orthomorphisms of Abelian groups — 327**

Igor S. Sergeev

**On the complexity of monotone circuits for threshold
symmetric Boolean functions — 345**

Vladimir A. Vatutin and Elena E. Dyakonova

**Properties of multitype subcritical branching processes
in random environment — 367**
