DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

PRINTING Franz X. Stückle Druck und Verlag e.K., Ettenheim

Contents

Aubrey Blecher, Charlotte Brennan, and Arnold
Knopfmacher

The site-perimeter of compositions — 75

Ekaterina K. Karelina

Some cardinality estimates for the set of correlation-immune Boolean functions — 91

Stepan A. Komkov

Continuity of classes of functions in multivalued logic with minimal logarithmic growth rate — 97

Sergey S. Marchenkov and Vasilii A. Prostov

Completeness criterion with respect to the enumeration closure operator in the three-valued logic — 105

Dmitry G. Meshchaninov

Some families of closed classes in P_k defined by additive formulas — 115

Svetlana N. Selezneva

Finding periods of Zhegalkin polynomials — 129

Alexey S. Shvedov

Admissible and Bayes decisions with fuzzy-valued losses — 139
