DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

PRINTING Franz X. Stückle Druck und Verlag e.K., Ettenheim

Contents

Ivan V. Chizhov and Mikhail A. Borodin

Classification of Hadamard products of one-codimensional subcodes of Reed–Muller codes — 297

Konstantin Yu. Denisov

Asymptotical local probabilities of lower deviations for branching process in random environment with geometric distributions of descendants — 313

Vitalii V. Iudelevich

On the “tree” structure of natural numbers — 325

Alexander S. Rybakov

Estimates of lengths of shortest nonzero vectors in some lattices, II — 341

Aleksandr S. Tissin

Curvature of the Boolean majority function — 359

Kirill D. Tsaregorodtsev

Properties of proper families of Boolean functions — 369
