Yuri I. Matiyasevich, St. Petersburg

Lev Ya. Savelyev, Novosibirsk

Sergei A. Stepanov, Moscow

DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

Contents

Aleksandr A. Makhnev and Mikhail P. Golubyatnikov

On small distance-regular graphs with the intersection arrays $\{mn - 1, (m - 1)(n + 1), n - m + 1; 1, 1, (m - 1)(n + 1)\}$ — 273

Serafim P. Maksakov and Marina M. Sorokina

On algebraicity of lattices of ω -fibred formations of finite groups — 283

Sergey S. Marchenkov

On polynomial-modular recursive sequences — 293

Boris A. Pogorelov and Marina A. Pudovkina

Classes of piecewise-quasilinear transformations on the generalized 2-group of quaternions — 299

Maksim P. Savelov

Limit theorem for a smoothed version of the spectral test for testing the equiprobability of a binary sequence — 317

Vladimir I. Vinokurov

Limit theorem for stationary distribution of a critical controlled branching process with immigration — 325
