DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

Contents

Gleb A. Isaev

Propagation criterion for monotone Boolean functions with least vector support set of 1 or 2 elements 61

Yuriy S. Kharin and Valeriy A. Voloshko

On the approximation of high-order binary Markov chains by parsimonious models 71

Sergey A. Korneev

On the complexity of implementation of a system of three monomials of two variables by composition circuits 89

Sergei A. Lozhkin and Vadim S. Zizov

Asymptotically sharp estimates for the area of multiplexers in the cellular circuit model 103

Igor G. Shaposhnikov

Inverse homomorphisms of finite groups 117
