DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

Contents

Gavriil A. Bakay

On large deviations of the moment of attaining far level by the random walk in a random environment — 187

K. Yu. Denisov

Asymptotic local lower deviations of strictly supercritical branching process in a random environment with geometric distributions of descendants — 197

Mikhail A. Iordanskiy

Cloning operations and graph diameter — 207

Mikhail A. Mestetskiy and Mikhail S. Shupletsov

Relations between energy complexity measures of Boolean networks and positive sensitivity of Boolean functions — 211

Yuriy L. Pavlov

On the maximal size of tree in a random forest — 221

Svetlana N. Selezneva

Deciding multiaffinity of polynomials over a finite field — 233

Andrey M. Zubkov and Petr V. Khalipov

Probability that given vertices belong to the same connected component of random equiprobable mapping — 245
