DE GRUYTER

DISCRETE MATHEMATICS AND APPLICATIONS provides the latest information on the development of discrete mathematics in Russia to a world-wide readership. The journal contains papers from the Russian-language journal *Diskretnaya Matematika*, the only journal of the Russian Academy of Sciences devoted to this field of mathematics. *Discrete Mathematics and Applications* covers various subjects in the fields such as combinatorial analysis, graph theory, functional systems theory, cryptology, coding, probabilistic problems of discrete mathematics, algorithms and their complexity, combinatorial and computational problems of number theory and of algebra. The journal is published bimonthly, simultaneously with the Russian edition as a cover-to-cover translation. Issues contain, in addition to original articles and reviews in the above-mentioned subject areas, reviews of books published in and outside Russia and information notes.

Please see the journal's homepage for Abstracting & Indexing Services information.

ISSN 0924-9265 · e-ISSN 1569-3929 · CODEN DMAPEW

All information regarding subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/dma.

Contents

Dmitry A. Burov

On cosets in the direct product of groups whose images by bijective mappings from factors to groups are cosets — 63

Aleksandr V. Cheremushkin

On the linear disjunctive decomposition of a p -logic function into a sum of functions — 85

Ivan V. Chizhov

Hadamard square of series connected linear codes — 93

Vladimir G. Ryabov

New bounds for the nonlinearity of PN functions and APN functions over finite fields — 113

Svetlana N. Selezneva

Describing the closed class of polynomial functions modulo a power of a prime number by a relation — 125
