

Publisher's note

European Journal of Nanomedicine

We felt very honored when the European Foundation for Clinical Nanomedicine (CLINAM) entrusted the *European Journal of Nanomedicine* to our publishing house last fall. The Journal has been the official publishing organ of the CLINAM since 2008. It was meant to serve as an additional voice to promote the growing significance of Nanomedicine and its European perspective on it. Today, we want to present its first issue of volume 4, now published at De Gruyter.

The Editor-in-Chief, Prof. Patrick Hunziker (University Hospital and CLINAM, Basel, CH) together with the Associate Managing Editor Beat Löffler (CLINAM) will channel, guide and direct the editorial process supported by Dr. Karin Lason as Managing Editor at De Gruyter. The amplified editorial board beholds internationally renowned, outstanding scientists covering the journal's scope aspects from basic research to applied nanotechnologies.

State-of-the-art hosting for online content is provided on the De Gruyter Online platform (see www.degruyter.com/view/j/ejnm for more information). Volume 4 of the *European Journal of Nanomedicine* came to light in January this year with a first ahead of print article. Once online, the contribution became immediately citable by means of its DOI. Timely speed with which articles are processed and published is as well established through the online manuscript submission and tracking system (Thomson Reuters ScholarOne) – please submit your manuscripts online at <http://mc.manuscriptcentral.com/ejnm>. All manuscripts undergo

obligatory peer-reviewing. The journal will have four issues per year and shall be included in PubMed as well as many other major abstracting and indexing services. Active reference linking in the PDF articles of the online edition, forward linking, color figures free of charge for authors in both print and online are merely a few of the services offered.

De Gruyter is an independent academic publishing house with a tradition spanning over 260 years. With offices in Berlin, Boston and Beijing we publish annually over 800 new book titles in medicine, the physical sciences, law and the humanities, and well over 200 journals and digital media; examples of which are: *Nanotechnology Reviews*, *Reviews in Analytical Chemistry*, *Science and Engineering of Composite Materials*, *Innovative Neurosurgery*, *Nano Energy and Nano Environment*, and *Nanophotonics*.

The transfer of the *European Journal of Nanomedicine* to our publishing house forms part of the policy to extend our portfolio to emerging research frontiers like in this case linking nanotechnology to clinical medicine.

With verve and dedication and in close cooperation with the CLINAM we at De Gruyter are very confident to make the *European Journal of Nanomedicine* an important multiplier and enhancer of knowledge on all aspects of Nanomedicine for the benefit of patients.

We very much appreciate the opportunity for dialogue with our authors and readers – please let us know your ideas and suggestions.

Dr. Alexander Grossmann,
Vice President Publishing,
Editorial Director Medicine.

Dr. Karin E. Lason,
Managing Editor
European Journal of Nanomedicine.

Wolfgang Böttner,
Director Publishing,
Journal Division.
