Special Issue: In memory of Professor Dr. Masanori Iwase on “Thermodynamics and Kinetics of Materials Processing”

Issue Editors: Yoshio Waseda and Alex McLean

Waseda Yoshio and Alex McLean

Preface — 299

Reviews

KC Mills, L Yuan, Z Li, GH Zhang and KC Chou

A Review of the Factors Affecting the Thermophysical Properties of Silicate Slags — 301

Masanori Suzuki, Toshihiro Tanaka

Thermodynamic Prediction of Spinodal Decomposition in Multi-component Silicate Glass for Design of Functional Porous Glass Materials — 323

Regular Papers

Takuya Teratoko, Nobuhiro Maruoka, Hiroyuki Shibata and Shin-ya Kitamura

Dissolution Behavior of Dicalcium Silicate and Tricalcium Phosphate Solid Solution and other Phases of Steelmaking Slag in an Aqueous Solution — 329

Boris B. Straumal, Alena S. Gornakova, Olga B. Fabrichnaya, Mario J. Kriegel, Andrey A. Mazilkin, B. Baretzky, A. M. Gusak and S. V. Dobatkin

Effective Temperature of High Pressure Torsion in Zr-Nb Alloys — 339

Luckman Muhmood, Anna Semykina, Masanori Iwase and Seshadri Seetharaman

Some Novel Studies of Thermodynamics, Kinetics and Transport Phenomena in Slags — 351

Michal Besterci, Katarína Sülleiová and Oksana Velgosová

Kinetics of Mechanical Alloying, Mechanical Properties of Micro and Nanostructural Al-C Systems — 359

A. Kaczmarek, Z. Grzesik and S. Mrowec

On the Defect Structure and Transport Properties of Co_3O_4 Spinel Oxide — 371

Sheikh A. Rezan, Guangqing Zhang and Oleg Ostrovski
Phase Development in Carbothermal Reduction and Nitridation of Ilmenite Concentrates — 381

D.C. Walker, W.F. Caley, S. Ferenczy and G.J. Kipouros
Modification of Steelmaking Slag by Additions of Salts from Aluminum Production — 389

K.T. Jacob, R. Adharsh

Thermodynamics of Congruent Oxidation — 395

Y. Ueda, T. Nakajima, T. Ishii, R. Tsujino and M. Iguchi
Numerical Simulation of Gas-Liquid Two-Phase Flow in a Horizontally Placed Hydrophobic Rectangular Channel (Part 1, Influence of Abrupt Expansion) — 405

Y. Ueda, T. Nakajima, T. Ishii, R. Tsujino and M. Iguchi
Numerical Simulation of Gas-Liquid Two-Phase Flow in a Horizontally Placed Hydrophobic Rectangular Channel (Part 2, Influence of Abrupt Contraction) — 411

M. Hasegawa, T. Hayashi, T. Sasaki and M. Iwase
Activities of Fe_xO in $\text{Na}_2\text{O-Al}_2\text{O}_3\text{-SiO}_2\text{-Fe}_x\text{O}$ Homogeneous Liquid Slags at 1673 K — 415

M. Hasegawa, Y. Kashiwaya and M. Iwase
Thermodynamic Properties of Solid Solutions between Di-calcium Silicate and Tri-calcium Phosphate — 421

Yoshiyuki Ueshima, Hisashi Kato, Katsumi Kondo and Toshiaki Mizoguchi
Dissolution Behavior of Calcium into Molten Steel — 431

Noriaki Kurita, Kenji Kobayashi, Yoshinori Heda and Norihiko Fukatsu
Oxygen Liberation from Stabilized Zirconia upon Changing DC Polarization Condition — 439

S. Fujieda, K. Shinoda, T. Inanaga, M. Abumiya and S. Suzuki
Dissolution Characteristics and Morphology of Large-sized Scorodite Particles Synthesized from Fe(II) and As(V) in Aqueous Solution — 451

Sohei Sukenaga, Kakeru Kusada, Noritaka Saito and Kunihiko Nakashima
Capacitance Measurement of Molten Calcium Silicate under Shear Stress Field — 459

Y. Ito, M. Hasegawa, Y. Kashiwaya and M. Iwase
Effect of Wood Biomass Addition on the Char Making Process of Waste Plastic for Controlling the Combustion Efficiency — 465

Hiroshi Nishimoto, Youngjo Kang, Takeshi Yoshikawa and Kazuki Morita
The Rate of Boron Removal from Molten Silicon by CaO-SiO₂ Slag and Cl₂ Treatment — 471

Yu-ichi Uchida, Yasuo Kishimoto, Yuji Miki and Masanori Iwase
Activities of FeO in Industrial Slags Used for External Removal of Phosphorous from Hot Metal — 479

Hiroki Hasegawa, Hiromichi Ohta, Hiroyuki Shibata and Yoshio Waseda
Recent Development in the Investigation on Thermal Conductivity of Silicate Melts — 491

Diletta Sciti, Laura Silvestroni, Laura Esposito, Kunihiko Nakashima, Noritaka Saito, Yoshinori Yamaoka and Andreas M. Glaeser
Advances in Transient-Liquid-Phase Bonding of Ultra-high Temperature ZrC Ceramics — 501

T. Hirano, T. Tosho, T. Watanabe and T. Akiyama
Self-propagating High-temperature Synthesis of La_{1-x}Sr_xMn_yFe_{1-y}O₃ Perovskites for Soot Combustion Catalyst — 513

Yindong Yang, Paul Wu, George Men and Alex McLean
Hot Metal Desulphurization Using Waste Residues from the Aluminum Industry — 519

G.A. Sweet, S. Ferenczy, W.F. Caley and G.J. Kipouros
Additions of Salt Cake and KAlF₄ from Aluminum Production to Steelmaking Slags — 529

Z. Grzesik, S. Mrowec
High Temperature Corrosion of Metallic Materials in Composed Oxidizing Environments — 539

Masao Miyake, Takashi Sugiura and Tetsuji Hirato
Preparation of Polycrystalline CdTe Films by Annealing of Amorphous Films Electrodeposited from Ammoniacal Alkaline Baths — 553

Takahiko Matsumoto, Hiroyuki Matsuura and Fumitaka Tsukihashi
Oxidation and Evaporation Behaviors of Cr, Cu and As During Incineration of Wood Treated by Chromated Copper Arsenate Preservative — 559

Jingxi Zhu, Jinichiro Nakano, Tetsuya Kenneth Kaneko, Haoyuan Mu, James P. Bennett, Kyei-Sing Kwong, Peter Rozelle and Seetharaman Sridhar
Viscosity Determination of Molten Ash from Low-Grade US Coals — 569

Zhi Li, Stavros A. Argyropoulos
Determination of Thermal Conductivity of Mn-Al Powder Compacts using An Inverse Heat Transfer Procedure — 581

M. Zaharia, V. Sahajwalla, N. Saha-Chaudhury, P. O’Kane, A. Fontana, C. Skidmore and D. Knights
Recycling of Rubber Tyres in Electric Arc Furnace Steelmaking: Carbon/Slag Reactions of Coke/Rubber Blends — 593

C. T. Harris, C. A. Pickles and J. G. Peacey
A Thermodynamic Analysis of the Selective Sulphidation of Nickel from a Nickeliferous Lateritic Ore — 603

B. Chambers, C. A. Pickles and J. G. Peacey
Thermodynamic Analysis of the Sulphation Roasting of Enargite Concentrates — 613

Leili Tafaghodi Khajavi, Mansoor Barati
Thermodynamics of Phosphorus Removal from Silicon in Solvent Refining of Silicon — 627

Roderick Guthrie, Mihaiela Isac
In-Situ Sensors for Liquid Metal Quality — 633

Miia Kiviö, Lauri Holappa, Takeshi Yoshikawa and Toshihiro Tanaka
Interfacial Phenomena in Fe-TiC Systems and the Effect of Cr and Ni — 645

Evgueni Jak, Peter Hayes

**The Use of Thermodynamic Modeling to Examine Alkali
Recirculation in the Iron Blast Furnace — 657**

K. Kobayashi, T. Hiraki and T. Nagasaka

**Oxidation of Pure Solid CaS with Ar-O₂ Gas
Mixture — 667**
