

INTERNATIONAL JOURNAL OF CHEMICAL REACTOR ENGINEERING

EDITORS

Hugo de Lasa, The University of Western Ontario, Canada
Charles Xu, The University of Western Ontario, Canada

FOUNDING EDITORS

Franco Berruti, The University of Western Ontario, Canada
Cedric Briens, The University of Western Ontario, Canada
Hugo de Lasa, The University of Western Ontario, Canada

EDITORIAL BOARD

Orlando Alfano, Universidad del Litoral, Argentina
Jose Arandes, Universidad del Pais Vasco, Spain
Xiaotao Bi, University of British Columbia, Canada
Yi Cheng, Tsinghua University, China
Jamal Chouki, Ecole Polytechnique, Montreal, Canada
Anthony G. Dixon, Worcester Polytechnic Institute, USA
Gulsen Dogu, Gazi University, Turkey
Milorad P. Dudukovic, Washington University – St. Louis, USA
Thierry Gauthier, Institut Français du Pétrole, France
John R. Grace, University of British Columbia, Canada
Murray Gray, University of Alberta, Canada
Santosh Gupta, Indian Institute of Technology, Kanpur, India

Mohammad M. Hossain, King Fahd University of Petroleum and Minerals, Saudi Arabia
Serge Kaliaguine, Université Laval, Canada
Sibudjing Kawi, National University of Singapore, Singapore
Samir Khanal, University of Hawaii, USA
Paola Lettieri, University College London, United Kingdom
Yasuo Ohtsuka, Akita University, Japan
Ajay Kumar Ray, University of Western Ontario, Canada
Wensheng Qin, Lakehead University, Canada
Alirio Rodrigues, Universidade do Porto, Portugal
Benito Serrano Rosales, Universidad de Zacatecas, Mexico
Hallvard F. Svendsen, Norwegian University of Science and Technology, Norway
Zhongchao Tan, University of Waterloo, Canada
Enrico Tronconi, Politecnico di Milano, Italy
J. Ruud van Ommen, Delft University of Technology, The Netherlands
Guus van Rossum, University of Twente, The Netherlands
Fei Wei, Tsinghua University, China
Joachim Werther, Technical University Hamburg-Harburg, Germany
Gabriel Wild, Ecole Nationale Supérieure des Industries Chimiques, France

DE GRUYTER

The International Journal of Chemical Reactor Engineering (IJCRE) covers the broad fields of theoretical and applied reactor engineering. The range of topics includes single-phase and multi-phase reactor design, operation and control, new chemical reactor concepts, fluid mechanics and fluid dynamics, computational fluid dynamics, catalysis, low and high pressure and temperature operation, environmental and economical implications, as well as topics drawn from the substantial areas of overlap between reaction and reactor engineering. The journal is edited by an impressive list, including Franco Berruti, Cedric Briens, and Hugo de Lasa, leading specialists in chemical reactor engineering. Professor Berruti is the Dean of the School of Engineering at the University of Western Ontario. Authors include notable, international professors from Imperial College London, the Norwegian School of Science and Technology, and Bayer Corporation.

The publisher, together with the authors and editors, has taken great pains to ensure that all information presented in this work (programs, applications, amounts, dosages, etc.) reflects the standard of knowledge at the time of publication. Despite careful manuscript preparation and proof correction, errors can nevertheless occur. Authors, editors and publisher disclaim all responsibility for any errors or omissions or liability for the results obtained from use of the information, or parts thereof, contained in this work.

The citation of registered names, trade names, trademarks, etc. in this work does not imply, even in the absence of a specific statement, that such names are exempt from laws and regulations protecting trademarks etc. and therefore free for general use.

Contents

Special Issue: Multiphase Flow in Industrial Plant

Guest Editors: Renzo Di Felice, Marco Fossa, Mario Misale, Annalisa Marchitto

Editorial

Renzo Di Felice, Marco Fossa, Mario Misale and Annalisa Marchitto

Special Issue Published in the Occasion of the 13th International Conference on Multiphase Flows in Industrial Plants (13th MFIP) held in Sestri Levante (Italy) from the 17th to the 19th of September 2014 — 447

Special Issue Articles

Henrik Ström, Srdjan Sasic, Klas Jareteg and Christophe Demazière

Behaviour and Stability of the Two-Fluid Model for Fine-Scale Simulations of Bubbly Flow in Nuclear Reactors — 449

Diego Barletta and Massimo Poletto

A Model on the Stability of a Pipe in an Aerated Silo — 461

Takahiro Okazaki, Zensaku Kawara, Takehiko Yokomine and Tomoaki Kunugi

Enhancement of MSF Using Microbubbles — 469

Jannike Solsvik and Hugo A. Jakobsen

Single Air Bubble Breakup Experiments in Stirred Water Tank — 477

Davide Del Col, Marco Azzolin, Alberto Bisetto and Stefano Bortolin

Frictional Pressure Drop during Two-Phase Flow of Pure Fluids and Mixtures in Small Diameter Channels — 493

Daniela Galatro, Dario Ercolani and Daniel Fuerthbauer

A Practical Approach to Operational Hydrodynamic Slug Analysis in Pipelines — 503

M. Battistin, S. Berry, A. Bitadze, P. Bonneau, J. Botelho-Direito, G. Boyd, F. Corbaz, O. Crespo-Lopez, E. Da Riva, C. Degeorge, C. Deterre, B. DiGirolamo, M. Doubek, G. Favre, J. Godlewski, G. Hallewell, S. Katunin, D. Lefils, D. Lombard, S. McMahon, K. Nagai, D. Robinson, C. Rossi, A. Rozanov, V. Vacek and L. Zwalinski

The Thermosiphon Cooling System of the ATLAS Experiment at the CERN Large Hadron Collider — 511

A. Martínez, P. Lisbona, Y. Lara and L. M. Romeo

Energy Intensity Reduction of Ca-Looping CO₂ Capture by Applying Mixing Loop Seals and Cyclonic Systems — 523

Moftah Alshaikh and William Dempster

A CFD Study on Two-Phase Frozen Flow of Air/Water Through a Safety Relief Valve — 533

J. D. P. Araújo, J. M. Miranda and J. B. L. M. Campos

CFD Study of the Hydrodynamics of Slug Flow Systems: Interaction between Consecutive Taylor Bubbles — 541

F. Devia, A. Marchitto, M. Fossa and G. Guglielmini

CFD Simulations Devoted to the Study of Fitting Effects on the Phase Distribution in Parallel Vertical Channels — 551
