**INTERNATIONAL JOURNAL OF EMERGING ELECTRIC POWER SYSTEMS (IJEPS)** publishes significant research and scholarship related to latest and up-and-coming developments in power systems. The mandate of the journal is to assemble high quality papers from the recent research and development efforts in new technologies and techniques for generation, transmission, distribution and utilization of electric power. The range of topics includes electric power generation sources; integration of unconventional sources into existing power systems; generation planning and control; new technologies and techniques for power transmission, distribution, protection, control and measurement; power system analysis, economics, operation and stability; deregulated power systems; power system communication; metering technologies; demand-side management; industrial electric power distribution and utilization systems.
