Reviewer Assessment

P. Poxleitner et al.: Virtual tumor mapping and margin control with 3-D planning and navigation

Reviewers' Comments to Original Submission

Reviewer 1: Werner, Jens

Date received: 07-Dec-2021
Reviewer recommendation: **Return to author for minor modifications**
Reviewer overall scoring: **High**

Comments to author:
This is a nice review on computer technology based treatment approaches for head&neck Cancers. The subchapters are well chosen aand written. SInce the article is directed towards beginners in the field, some additional examples should be included in the article.
.
