DE GRUYTER

JOURNAL OF APPLIED ANALYSIS is an international journal devoted to applications of mathematical analysis. Among them there are applications to economics (in particular finance and insurance), mathematical physics, mechanics and computer sciences. Topics include applications of mathematical analysis (real and complex, harmonic, convex, variational), differential equations, dynamical systems, optimization (linear, nonlinear, convex, nonsmooth, multicriterial), optimal control, stochastic modeling and probability theory, numerical methods. The journal also welcomes works showing connections between mathematical analysis and other domains of mathematics such as geometry, topology, logic and set theory.

Journal of Applied Analysis is jointly produced by the Institute of Mathematics of the Technical University of Łódź and De Gruyter.

All information regarding notes for contributors, subscriptions, Open access, and orders is available online at www.degruyter.com/jaa.

Contents

T. H. Steele

Dynamics of typical Baire-1 functions on the interval — 59

Tajedin Derikvand, Rajab Ali Kamyabi-Gol,
Mohammad Janfada

On the generalized quotient integrals on homogeneous spaces — 65

Mostafa Maslouhi

An integral expression for the Dunkl kernel in the dihedral setting — 73

Łukasz Sadowski

Takagi function revisited — 85

Sharad Dwivedi, Shruti Dubey

On the stability of steady-states of a two-dimensional system of ferromagnetic nanowires — 89

Małgorzata Chudziak, Barbara Sobek

Pexider type equation on a region — 101

Lingju Kong, Jacob Parsley, Kaitlin Rizzo, Nicholas Russell

Anti-periodic solutions for a higher order difference equation with p -Laplacian — 111

Lesław Gajek, Elżbieta Krajewska

Portfolio immunization under cone restrictions — 127

Wojciech S. Ożański

The Lagrange multiplier and the stationary Stokes equations — 137

Muhad H. Abregov, Vladimir Z. Kanchukoev,
Maryana A. Shardanova

Numerical methods for solving the first-kind boundary value problem for a linear second-order differential equation with a deviating argument — 141
