JOURNAL OF APPLIED GEODESY is a forum for peer-reviewed research articles in the area of application of geodesy to engineering and other natural sciences. It publishes innovative contributions on sensor developments, multi-sensor systems and sensor data fusion focusing on the capture of georeferenced data. Hence topics related to navigation and mobile mapping will also be covered. The scope includes optical and microwave 3-D measurement techniques and other sensors for geotechnical measurements. Furthermore, applied geodesy articles from all areas of satellite-based geodetic networks, deformation measurements, deformation analysis, modelling of local geodynamic processes and the development of intelligent alert systems, measurement techniques for large construction sites and mechanical engineering will be presented. With increased use of the tools of Artificial Intelligence for sensor control, sensor fusion and data analysis, manuscripts on these topics with a strong emphasis on applied geodesy will also be published.

# **Contents**

# **Research Articles**

Xinpeng Wang, Shengxiang Huang, Guanqing Li, Chenfeng Li, and Wen Zhang

Theoretical analysis of the influence of plane control network on lateral breakthrough error of long immersed tunnel —— 241

Qian Fan, Xiaolin Meng, Dinh Tung Nguyen, Yilin Xie, and Jiayong Yu

Predicting displacement of bridge based on CEEMDAN-KELM model using GNSS monitoring data —— 253

Manoj Deo and Ahmed El-Mowafy

Precise point positioning with decimetre accuracy using wide-lane ambiguities and triple-frequency GNSS data —— 263

Giribabu Dandabathula, Manish Verma, and Srinivasa Rao Sitiraju

Evaluation of best-fit terrain elevation of ICESat-2 ATL08 using DGPS surveyed points —— 285

Chuandong Zhu, Wei Zhan, Jinzhao Liu, and Ming Chen

Application of singular spectrum analysis in reconstruction of the annual signal from GRACE —— 295

Wantong Chen and Zhenghui Shang

Precision point positioning with additional baseline vector constraint —— 303

Thanate Jongrujinan and Chalermchon Satirapod Stochastic modeling for VRS network-based GNSS RTK with residual interpolation uncertainty —— 317

Mohammad Omidalizarandi, Ralf Herrmann, Boris Kargoll, Steffen Marx, Jens-André Paffenholz, and Ingo Neumann

A validated robust and automatic procedure for vibration analysis of bridge structures using MEMS accelerometers —— 327

## Review

Kamil Maciuk

Short-term analysis of internal and external CORS clocks —— 355
