

JOURNAL OF APPLIED GEODESY

EDITORS-IN-CHIEF

Hans-Berndt Neuner, Vienna

Chris Rizos, Sydney

EDITORIAL BOARD

Xiaoli Ding, Hong Kong

Andreas Eichhorn, Darmstadt

Naser El-Sheimy, Calgary

Linlin Ge, Sydney

Vassilis Gikas, Athens

Dorota Grejner-Brzezinska, Columbus

Cheinway Hwang, Hsinchu

Allison Kealy, Melbourne

Heiner Kuhlmann, Bonn

Hansjorg Kutterer, Frankfurt

Xiaolin Meng, Nottingham

Gyula Mentés, Sopron

Wolfgang Niemeier, Braunschweig

Alexander Reiterer, Freiburg

Guenther Retscher, Vienna

Volker Schwieger, Stuttgart

Peter Teunissen, Delft and Perth

Andreas Wieser, Zürich

Caijun Xu, Wuhan

DE GRUYTER

JOURNAL OF APPLIED GEODESY is a forum for peer-reviewed research articles in the area of application of geodesy to engineering and other natural sciences. It publishes innovative contributions on sensor developments, multi-sensor systems and sensor data fusion focusing on the capture of georeferenced data. Hence topics related to navigation and mobile mapping will also be covered. The scope includes optical and microwave 3-D measurement techniques and other sensors for geotechnical measurements. Furthermore, applied geodesy articles from all areas of satellite-based geodetic networks, deformation measurements, deformation analysis, modelling of local geodynamic processes and the development of intelligent alert systems, measurement techniques for large construction sites and mechanical engineering will be presented. With increased use of the tools of Artificial Intelligence for sensor control, sensor fusion and data analysis, manuscripts on these topics with a strong emphasis on applied geodesy will also be published.

Please see the journal's homepage for Abstracting & Indexing Services information.

The publisher, together with the authors and editors, has taken great pains to ensure that all information presented in this work (programs, applications, amounts, dosages, etc.) reflects the standard of knowledge at the time of publication. Despite careful manuscript preparation and proof correction, errors can nevertheless occur. Authors, editors and publisher disclaim all responsibility for any errors or omissions of liability for the results obtained from use of the information, or parts thereof, contained in this work.

The citation of registered names, trade names, trademarks, etc. in this work does not imply, even in the absence of a specific statement, that such names are exempt from laws and regulations protecting trademarks etc. and therefore free for general use.

All information regarding notes for contributors, subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/jag.

Contents

Review

Aleksandra Maciejewska and Kamil Maciuk
Research using GNSS (Global Navigation Satellite System) products – a comprehensive literature review — 555

Original Research Articles

Satrio Muhammad Alif, Muhammad Ravid Erlando, Ongky Anggara and Misfallah Nurhayati
Impact of baseline length on uncertainty in static relative GNSS positioning — 575

Omidreza Daneshmandi, Iman Hosseini, Arsalan Dabbagh, Iman Dehbozorgi, Ali Hosseinzadeh and Zahra Mehrmohammadi
Advancing magnetometer calibration: a sequential tri-axis approach — 585

Łukasz Borowski, Piotr Banasik and Kamil Maciuk
Application of GNSS-levelling for updating the base vertical network — 595

Irma Yusiyanti, Fina Alfi Khasanah, Kautsar Rahtandi Trihandaru, Tattyana Wening Kalbuadi Prajardi, Cecep Pratama and Sidik Tri Wibowo
Spatiotemporal postseismic deformation due to the 2018 Palu-Donggala earthquake revealed the relative importance of viscoelastic relaxation and the afterslip distribution estimated from geodetic observations — 607

Reham Nagib, Mohamed A. Abdelfatah, Ashraf K. Mousa and Gamal S. EL-Fiky
Evaluation of PPP software performance for TEC estimation using IRI-2020, CODE, COSMIC, and SWARM with GNSS data — 619

Markus Wagner, Berit Jost, Lasse Klingbeil and Heiner Kuhlmann
Evaluation of mobile mapping point clouds in the context of height difference estimation — 635

Tobias Schröder and Volker Schwieger
Automated gap and flush measurements between car parts assisted by a highly flexible and accurate robot system — 653

Kursheed Mohammed, Dattatreya Sarma Achanta, Lakshmana Kuruva and Lakshmi Sreenivasa Reddy Dirisinapu
Comprehensive statistical analysis of scintillations on L-band signals from six GNSS constellations over low-latitude region — 665

Gomaa M. Dawod and Essam M. Al-Krargy
Recent estimates of crustal deformation and land subsidence in the Nile Delta, Egypt using GNSS-PPP datasets over 2012–2024 — 679

Heba K. Khayyal, Fawzi H. Zarzoura, Mahmoud El-Mewafi and Ashraf G. Shehata
Influence of orbit and clock file diversity on GNSS ambiguity resolution — 691

Dawid Kwaśniak and Marcin Uradziński
The usefulness of the MAFA method for smartphone precise positioning — 703

Valanon Uaratanawong and Chalermchon Satirapod
Comparative analysis of pseudorange multipath mitigation performance using K-means and Fuzzy c-means clustering techniques — 713

Srilatha Talluri, Ravi Kumar Mokkapati, Swapna Raghunath and Venkata Ratnam Devanaboyina
Estimation of GPS-based ionospheric indices by GIX, SIDX, and ROTI during the St. Patrick's Day geomagnetic storm event in the Indian low latitude region — 737

Mohammed Yousuf, Sridhar Miriyala and Nirvikar Dashora
Post-midnight impact of ionospheric irregularities on GPS based kinematic precise point positioning — 749
