Preface

DOI: 10.1515/jiip-2016-5001

This special issue consists of the selected papers of participants of the 7th International Conference “Inverse Problems: Modeling and Simulation”, which was held during May 26–31, 2014, in Ölüdeniz, Fethiye, Turkey. As with the previous conferences, the objective of this conference was to be multidisciplinary and international, bringing together scientists working on various topics of inverse problems in diverse areas of engineering and science. The main aim of the conference was to bring together all classical and new inverse problems areas from various international scientific schools and to discuss new challenges of inverse problems in current interdisciplinary sciences. The conference has been supported by the Scientific and Technological Research Council of Turkey (TUBITAK) (Grant no. 1929B021300825).

The 8th International Conference “Inverse Problems: Modeling and Simulation” will be held during May 23–28, 2016, in Ölüdeniz, Fethiye, Turkey. The main sponsors of the conference are Izmir University, École Polytechnique and The Eurasian Association on Inverse Problems (EAIP).
