Severe hypothetical accidents

H. Fabian and O. Gremm: On the investigation of severe accident scenarios	11
S. Hagen, P. Hofmann, G. Schanz and L. Sepold: CORA experiments on the behaviour of LWR fuel rod bundles under severe fuel damage conditions.	15
W. Hering and R. Meyder: Evaluation of CORA experiments using the Severe Core Damage Analysis Package (SCDAP).	21
K. Trambauer: Codes for the modeling of core and reactor cooling system behavior during severe accidents	26
H. Alsmeyer: Melt-concrete interaction during severe light water reactor accidents	30
G. Langer and M. Stock: Experimental investigations on hydrogen behaviour in reactor containments	39
G. Preußner: The multi-compartment code WAVCO	47
A. K. Chakraborty: Catalytic removal of hydrogen.	53
R. Heck: Catalytic and spark hydrogen igniters.	56
B. Kuzcera, H. Albrecht, H. Bunz and W. Schöck: Fission-product aerosols in the reactor containment under severe accident conditions	59
W. Morell and K. H. Neeb: Behaviour of fission-product iodine under severe accident conditions	69
H.-G. Dillmann, H. Pasler and J. G. Wilhelm: Containment venting filter designs incorporating stainless-steel fiber filters	75
B. Eckardt: Containment venting for light water reactor plants . . .	81
J. Czech and H. Roth-Seefrid: Premises, planning principles and examples of accident management	83
E. J. Kersting: Effectiveness of selected accident management measures.	88

J. F. Stelzer: The role of engineers in physics research	95
