

Independent Journal for  
Nuclear Engineering,  
Energy Systems,  
Radiation,  
and Radiological Protection

Editorial Board

Erich R. Bagge  
Franz Baumgärtner  
Anton Bayer  
Edgar Böhm  
Bernhard Bröcker  
Dieter Brosche  
Dietrich Bünemann  
Wulf Bürkle  
Günter Grieger  
Karl-Gerhard Hackstein  
Archie A. Harms  
Otto Hittmair  
Wolfgang Jacobi  
Alexander Kaul  
Yuri Kazansky  
Alfred Kraut  
Bernhard Kuczera  
Helmut Rauch  
Arthur Scharmann  
Walter Seifritz  
Erich Tenckhoff  
Wolfgang Weiss  
Rudolf Wienecke  
Friedwardt Winterberg

Editor

Alfred Kraut  
Universität der Bundeswehr München

|--------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Contents                                                                                                                                   | 257      |
| Calendar of Events                                                                                                                         | 258      |
| Summaries                                                                                                                                  | 260      |
| Professor Wilhelm Hanle in memoriam . . . . .                                                                                              | 263      |
| H. P. Berg, P. Brennecke: Basic considerations on radioactive waste classification regarding the different waste management steps. . . . . | 264      |
| M. Fumizawa: Discharge of a laminar argon jet into stagnant air . . . . .                                                                  | 269      |
| S. Y. Jiang, D. Emendörfer: Subcooled boiling and void flashing in a natural circulation system at heating reactor conditions . . . . .    | 273      |
| K. Skala: Ingress of water into a liquid lead-bismuth alloy of a neutron source . . . . .                                                  | 279      |
| F. Butuirat, M. Kielkiewicz, I. Moustafa: The method of sectional representation in aerosol dynamics . . . . .                             | 285      |
| M. Ravnik, H. Wimmer, A. Trkov, H. Böck, I. Mele: Burn-up measurements at TRIGA fuel elements containing strong burnable poison . . . . .  | 289      |
| S. Şahin, B. Şarer: Assessment of the neutron leakage spectrum of an enhanced radiation warhead for peaceful applications . . . . .        | 295      |
| D. Regulla, D. Schalch, A. Scharmann: Radiation exposure of civil aircrew . . . . .                                                        | 299      |
| R. Lehmann, R. Czarwinski: Radon exposure in buildings. . . . .                                                                            | 304      |
| Books                                                                                                                                      | 268, 288 |
| Advances                                                                                                                                   | 311      |
| Nuclear standards                                                                                                                          | 312      |
| Imprint                                                                                                                                    | 312      |
