DE GRUYTER

**MONTE CARLO METHODS AND APPLICATIONS** is a quarterly published journal presenting original articles on the theory and applications of Monte Carlo and quasi-Monte Carlo methods. Launched in 1995 the journal covers all stochastic numerics topics with emphasis on the theory of Monte Carlo methods and new applications in all branches of science and technology. The following topics will be covered: theory of Monte Carlo methods, quasi-Monte Carlo methods, integration, boundary value problems for PDE's, numerics of stochastic differential equations, simulation of random variables, stochastic processes and fields, and stochastic models in all fields of applied sciences.

All information regarding notes for contributors, subscriptions, Open access, back volumes and orders is available online at [www.degruyter.com/mcma](http://www.degruyter.com/mcma).
