

Supplementary material

Supplementary Table 1: Characteristics of cancer patients infected with SARS-CoV-2

ID	Sex	Age	Tumor type	Status	Severe events (Yes/No)
1	Male	83	Bladder cancer	Follow-up	Yes
2	Male	87	Colonic tubular adenocarcinoma	Follow-up	Yes
3	Male	67	Adrenal neoplasms	Post-operation	Yes
4	Female	68	Breast cancer	Post-operation (adjuvant chemotherapy), follow-up	Yes
5	Male	58	Chromophobe renal cell carcinoma	Recurrence, with immunotherapy	Yes
6	Female	62	Breast cancer	Post-operation (adjuvant chemotherapy), follow-up	Yes
7	Male	56	Rectal carcinoma	Post-operation (adjuvant chemotherapy), follow-up	No
8	Male	53	Transverse colon	Post-operation (adjuvant chemotherapy), follow-up	No
9	Female	63	Papillary thyroid	Post-operation, with TSH inhibition therapy	No
10	Male	47	NSCLC	Advanced, with chemotherapy	No
11	Female	52	Breast cancer	Post-operation	No
12	Male	47	Lymphoma	NA	No
13	Male	80	Bladder cancer	Post-operation	Yes
14	Male	79	Colorectal carcinoma	Follow-up	Yes
15	Male	63	NSCLC	Advanced, with chemotherapy	Yes
16	Female	58	NSCLC	Post-operation, follow-up	No
17	Male	58	NSCLC	Post-operation, with targeted therapy	No
18	Female	55	NSCLC	Advanced, with targeted therapy	No
19	Male	NA	NSCLC	Radiotherapy with targeted therapy	No
20	Male	NA	NSCLC	Chemoradiotherapy	Yes
21	Female	NA	NSCLC	Advanced, with best supportive care	No
22	Male	NA	NSCLC	Post-chemoradiotherapy, follow-up	Yes
23	Male	NA	NSCLC	Immunotherapy with chemotherapy	No
24	Male	NA	NSCLC	Immunotherapy with chemotherapy	No
25	Male	NA	NSCLC	Post-operation, follow-up	No
26	Male	NA	Rectal cancer	Best supportive care	No
27	Male	NA	Colon cancer	Newly diagnosed	No
28	Male	NA	Pancreatic cancer	Advanced, with best supportive care	Yes
29	Female	NA	Breast cancer	Adjuvant radiotherapy	No
30	Male	NA	Urothelial cancer	Advanced, with best supportive care	No

NSCLC, non-small-cell lung carcinoma.
