Zeitschrift für Kristallographie – New Crystal Structures was founded in 1997 as spin off of Zeitschrift für Kristallographie to meet the high demand to publish results of structure determination. All publications and their submitted CIF-data are online freely available (Open Access). Zeitschrift für Kristallographie — New Crystal Structures offers a place for researchers to present

- results of determinations of hitherto unknown crystal structures which do not justify detailed discussion of determination procedure, crystal structure, and/or structure-property relations (routine determinations and structures),
- refinement of previously published crystal structures which do not require a new description or discussion.

Further details of the structure determination can be accessed at the relevant database. Data with CSD numbers can be obtained from the Fachinformationszentrum Karlsruhe, Gesellschaft für wissenschaftlich-technische Information mbH, 76344 Eggenstein-Leopoldshafen, Germany (e-mail: crysdata@fiz-karlsruhe.de). Data with CCDC numbers can be obtained from the Cambridge Crystallographic Data Centre (CCDC), 12 Union Road, Cambridge CB2 1EZ, UK, (fax: +44-(0)1223-33 60 33 or e-mail: deposit@chemcrs.cam.ac.uk).

ONLINE-SUBMISSION New Crystal Structures (NCS) have to be submitted online as CIF-file to: <https://mc.manuscriptcentral.com/zkrist-ncs>

Please see the journal's homepage for Abstracting & Indexing Services information.
