Call for Symposia

Symposia dealing with all areas of neuroscience research are invited.

The applicant should submit a proposal containing the title of the planned symposium, the name(s) and address(es) of the organizer(s), a short description of the aims of the symposium and the names, addresses and topics of the speakers to be invited. The NWG strives to increase the proportion of women as organizers and speakers of symposia.

The gender distribution within each proposal will therefore be one selection criterion. The application must be submitted via the Society's website: <http://nwg.glia.mdc-berlin.de>

Deadline for submission of a symposium proposal:

February 1, 2010

Ninth Göttingen Meeting of the German Neuroscience Society

Stipends:

The German Neuroscience Society will provide stipends for young qualified researchers. Details will be announced at <http://www.nwg-goettingen.de/2011/>
