ABSTRACTING ORGANIZATIONS

Articles in this journal will be indexed and abstracted in Bulletin Signaletique, Chemical Abstracts, Current Contents, Engineering Index, Rheology Abstracts, and Science Citation Index.

FREQUENCY

The journal is a quarterly publication.

SUBSCRIPTION INFORMATION

Subscription price for Vol. 5 (1985): \$120
including postage.

For advertising rates apply to the publishers.

A specimen copy will be sent on request.

Subscription orders should be sent to:

FREUND PUBLISHING HOUSE, Suite 500, Chesham House, 150 Regent Street,
London, W1R 5FA, England.

THE JOURNAL OF POLYMER ENGINEERING
A NEW NAME

Polymer Engineering Reviews is taking a new name with this issue, the JOURNAL OF POLYMER ENGINEERING. This is in recognition of the large number of original papers we have been receiving since our beginning. It is hoped that the new title of our journal will further stimulate this trend and the JOURNAL OF POLYMER ENGINEERING will continue to develop in coming years into a leading repository for original research papers. Review articles will continue to be welcome. We are moving into this new period of our development with enthusiasm for the future.

The areas of concentration of the JOURNAL OF POLYMER ENGINEERING will remain the same as Polymer Engineering Reviews. Articles relating to basic research and innovation in polymer processing, characteristics and properties of fabricated products including composites and new applications are especially welcome.
