**Cyclone pressure drop reduction and its effect on gas–particle separation capability: principle, performance, and assessment**

<https://doi.org/10.1515/revce-2020-0100>

Rev Chem Eng 2022; 38(8): 1045–1063

**Review:** A state-of-the-art review on the pathways of cyclone pressure drop reduction and its effect on gas–particle separation, and the performance comparison and assessment using a proposed indicator

**Keywords:** cyclone separator; particle separation; pressure drop reduction; technical performance assessment.
