STATISTICAL APPLICATIONS IN GENETICS AND MOLECULAR BIOLOGY

EDITOR-IN-CHIEF

Michael P.H. Stumpf, Imperial College London, UK

FOUNDING EDITORS

Nicholas P. Jewell, University of California,
Berkeley, USA

Gary Churchill, The Jackson Laboratory, USA

Elizabeth Thompson, University of
Washington, USA

ASSOCIATE EDITORS

Mark Beaumont, University of Bristol, UK

Tim Beißbarth, University of Göttingen, Germany

Harald Binder, Johannes Gutenberg University
Mainz, Germany

Colin Gillespie, University of Newcastle, UK

Mayetri Gupta, University of Glasgow, Scotland, UK

Alan Hubbard, University of California,
Berkeley, USA

Dirk Husmeier, University of Glasgow,
Scotland, UK

Hongkai Ji, Johns Hopkins University, USA

Sunduz Keles, University of Wisconsin, USA

Kathleen Kerr, University of Washington, USA

Laura Lazzeroni, Stanford University, USA

Shili Lin, Ohio State University, USA

Ping Ma, University of Illinois at
Urbana-Champaign, USA

Paul Marjoram, University of Southern
California, USA

Bart Mertens, Leiden University Medical Centre,
The Netherlands

Olle Nerman, Chalmers University of
Technology, Sweden

Enrico G. Petretto, Imperial College London, UK

Vincent Plagnol, University College London, UK

Elizabeth Purdom, University of California,
Berkeley, USA

Magnus Rattray, University of Manchester, UK

Stephane Robin, Institut National de la Recherche
Agronomique Paris, France

Andrey Rzhetsky, University of Chicago, USA

Guido Sanguinetti, University of Edinburgh, UK

Korbinian Strimmer, University of Leipzig, Germany

Mark van der Laan, University of California,
Berkeley, USA

Arndt von Haeseler, Center for Integrative
Bioinformatics Vienna, Austria

David Wild, University of Warwick, UK

Carsten Wiuf, University of Copenhagen, Denmark

Hongyu Zhao, Yale University, USA

DE GRUYTER

Statistical Applications in Genetics and Molecular Biology seeks to publish significant research on the application of statistical ideas to problems arising from computational biology. The focus of the papers should be on the relevant statistical issues but should contain a succinct description of the relevant biological problem being considered. The range of topics is wide and will include topics such as linkage mapping, association studies, gene finding and sequence alignment, protein structure prediction, design and analysis of microarray data, molecular evolution and phylogenetic trees, DNA topology, and data base search strategies. Both original research and review articles will be warmly received.

ISSN 2194-6302 · e-ISSN 1544-6115

Contents

Research Articles

Diana M. Kelmansky, Elena J. Martínez and Víctor Leiva

A new variance stabilizing transformation for gene expression data analysis — 653

Shigeki Nakagome, Kenji Fukumizu and Shuhei Mano

Kernel approximate Bayesian computation in population genetic inferences — 667

Lazarus K. Mramba, Stuart Barber, Kerstin Hommola, Lee A. Dyer, Joseph S. Wilson, Matthew L. Forister and Walter R. Gilks

Permutation tests for analyzing cospeciation in multiple phylogenies: applications in tri-trophic ecology — 679

Sandra L. Taylor, Gary S. Leiserowitz and Kyoungmi Kim

Accounting for undetected compounds in statistical analyses of mass spectrometry 'omic studies — 703

Michelle R. Lacey, Carl Baribault and Melanie Ehrlich

Modeling, simulation and analysis of methylation profiles from reduced representation bisulfite sequencing experiments — 723

Ahmed Hossain and Joseph Beyene

Estimation of weighted log partial area under the ROC curve and its application to MicroRNA expression data — 743

Aaron Sim, Dimosthenis Tsagkrasoulis and Giovanni Montana

Random forests on distance matrices for imaging genetics studies — 757
