Received July 25, 2018; accepted July 25, 2018; previously published online August 27, 2018

unfortunately be long, and we share the opinion that it is reasonable to consider appropriate conservative treatment whilst waiting for nerve conduction studies.

Dear editor,

We thank Ly-Pen and Andréu for their valuable considerations [1] on our comment “Diagnosis of carpal tunnel syndrome” [2], and appreciate that they agree in our conclusion regarding the use of nerve conduction studies in suspected CTS. As noted, the waiting lists for such investigations may
